

■ CARLOS HERNÁNDEZ

■ PRODUCT [UX/UI] DESIGNER / FRONT-END MINDSET

México City · + 52 55 2847 0852 · kornersin@gmail.com · [LinkedIn](#) · [Portfolio](#)

Product Designer with 5+ years of experience and a strong technical Front-End mindset. Proven track record in optimizing product lifecycles and bridging the gap between Figma and production-ready code. Experienced in the FinTech sector, designing transactional user journeys and implementing DesignOps automation to streamline cross-functional workflows. I specialize in creating scalable design systems, reducing technical debt in HTML/CSS, and leveraging AI tools to enhance team productivity and business efficiency.

Skills

Product & UX Core

DesignOps & Automation · Product Discovery & Strategy · UX Research & User Testing · Information Architecture · Wireframing & Prototyping · Usability Heuristics & User flows

Interface & Design Systems

UI Design & Visual Systems · Interaction Design · Scalable Design Systems · Responsive & Adaptive Design · High-Fidelity Prototyping

Tech & Front-End Foundations

HTML5, CSS3 & SCSS · JavaScript & React (Foundations) · Bootstrap · PHP (Cake) · Git / GitHub · Clean Code & Technical Debt Optimization · Webhooks & Automation Logic

Tools, Data & Quality

Figma · Design QA · Google Analytics · GTMetrix / PageSpeed · AI-Assisted Development · FTP & Hosting Management · WordPress & CMS

Product Collaboration

Stakeholder Management · Cross-functional Collaboration · Communication · Leadership · Adaptability & Problem Solving · Process Optimization

Professional experience

UX / UI SR. Broxel Jan 2026 - Apr 2026

- DesignOps & Commercial Process Optimization: Developed a specialized internal platform using Google Apps Script and AI to streamline the submission of commercial promotions. This tool automated the validation of assets (dimensions and weight) and content consistency before reaching the UX team, significantly reducing operational friction and eliminating repetitive manual reviews.
- Legal Content & Version Control System: Engineered an automated repository for the Legal department to manage contract updates. The system synchronized Google Sheets with Webhooks to notify the UX team of changes, allowing for the organized storage and versioning of both UX-authored HTML files and Legal-provided PDF/Doc files.
- User Journey Mapping: Defined and visualized the end-to-end user flow for the "Tap to Pay" feature, identifying key interaction points and trigger moments for external notifications (WhatsApp/Email).
- Design QA & Visual Parity: Partnered with the engineering team to conduct QA on the Winnovate platform. Adapted and fine-tuned HTML layouts to ensure 1:1 visual parity between digital interfaces and physical contract standards.
- Code Optimization & Maintainability: Refactored and cleaned legacy HTML/CSS code for account statements and digital contracts. Focused on improving code indentation and structure to make them readable, manageable, and easier to integrate.
- Product Delivery (Gran Sociedad): Developed a responsive landing page based on a dark-themed brand book, later pivoting the UI to a light-themed aesthetic following a brand transition request. Generated high-quality visual assets using AI tools and delivered the final production-ready code for local-to-server deployment, ensuring a fast and accurate handoff.

Professional experience

Freelance Saak Solutions

Jul 2025 - Present

- **Scalable UI Systems:** Architected a comprehensive UI Kit in Figma that improved design-to-dev handoff efficiency by 65%.
- **Responsive Redesign:** Led the redesign of web and mobile interfaces, focusing on performance optimization and accessibility standards.
- **User-Centered Iteration:** Increased overall product usability by 35% through continuous iteration based on user feedback and stakeholder requirements.

Product UX/UI Designer G21

Apr 2024 - Jun 2025

- **Web Interface Development:** Designed and developed responsive landing pages and corporate sites, ensuring alignment with brand identity and technical performance goals.
- **Visual Identity & Assets:** Created high-fidelity mockups and digital assets, streamlining the handoff process between design and final implementation.
- **CMS Management:** Administered and customized web platforms, optimizing content structure for better user engagement.

UX/UI Designer / Front-End Developer Adryo

Jul 2022 - Sep 2023

- **Hybrid Development & Design:** Built and maintained reusable UI components using PHP and JavaScript, bridging the gap between Figma prototypes and production-ready code.
- **Data Visualization:** Designed and implemented a performance dashboard that improved client tracking efficiency by 45%, focusing on clear information architecture.
- **Interaction Design:** Developed interactive prototypes and visual systems, conducting heuristic evaluations to resolve usability friction points.
- **Defined design goals and sprint tasks** within agile workflows.
- **Improved usability and interaction** through heuristic evaluation.

UX/UI Designer & Front-End Developer Colectivo Tlacuache Urbano

Mar 2020 - May 2022

- Conducted user research, empathy mapping, and information structure.
- Designed website prototypes in Figma and developed sites in WordPress.
- Created and edited visual content for digital channels.

Education

- **Computer Science, Universidad de Londres** — 2024 – Present
- **DEV.F — Master in UX/UI & Coding** — 2020 – 2022

Certifications

- **Scrum Master** — Platzi, 2025
- **Design Sprint** — Platzi, 2026
- **IA Product Discovery** — Platzi, 2026
- **Product Management** — Platzi, 2026
- **Lean UX** — Udemy, 2021
- **Design Thinking** — Platzi, 2021
