

CARLOS HERNÁNDEZ

PRODUCT [UX/UI] DESIGNER / FRONT-END MINDSET

México City +52 55 2847 0852 kornersin@gmail.com [Linkedin](#) [Portfolio](#)

Product Designer with 5+ years of experience and a strong technical Front-End mindset. Proven track record in optimizing product lifecycles and bridging the gap between Figma and production-ready code. Experienced in the FinTech sector, designing transactional user journeys and implementing DesignOps automation to streamline cross-functional workflows. I specialize in creating scalable design systems, reducing technical debt in HTML/CSS, and leveraging AI tools to enhance team productivity and business efficiency.

SKILLS

Product & UX Core	Interface & Design Systems	Tech & Front-End Foundations
DesignOps & Automation, Product Discovery & Strategy, UX Research & User Testing, Information Architecture, Wireframing & Prototyping, Usability Heuristics & User flows	UI Design & Visual Systems, Interaction Design, Scalable Design Systems, Responsive & Adaptive Design, High-Fidelity Prototyping	HTML5, CSS3 & SCSS, PHP (Cake), Bootstrap, Git/GitHub, Clean Code, Technical Debt Optimization, Webhooks & Automation Logic, Technical Handoff & Front-End Architecture Understanding (React)
Tools, Data & Quality	Product Collaboration	
Figma, Design QA, Google Analytics, GTMetrix / PageSpeed, AI-Assisted Development, FTP & Hosting Management, WordPress & CMS	Stakeholder Management, Cross-functional Collaboration, Communication, Leadership, Adaptability & Problem Solving, Process Optimization	

PROFESSIONAL EXPERIENCE

UX/UI SR. Broxel	Jan 2026 - Apr 2026
DesignOps & Commercial Process Optimization: Developed a specialized internal platform using Google Apps Script and AI to streamline the submission of commercial promotions. This tool automated the validation of assets (dimensions and weight) and content consistency before reaching the UX team, significantly reducing operational friction and eliminating repetitive manual reviews. Legal Content & Version Control System: Engineered an automated repository for the Legal department to manage contract updates. The system synchronized Google Sheets with Webhooks to notify the UX team of changes, allowing for the organized storage and versioning of both UX-authored HTML files and Legal-provided PDF/Doc files. User Journey Mapping: Defined and visualized the end-to-end user flow for the "Tap to Pay" feature, identifying key interaction points and trigger moments for external notifications (WhatsApp/Email). Design QA & Visual Parity: Partnered with the engineering team to conduct QA on the Winnovate platform. Adapted and fine-tuned HTML layouts to ensure 1:1 visual parity between digital interfaces and physical contract standards. Code Optimization & Maintainability: Refactored and cleaned legacy HTML/CSS code for account statements and digital contracts. Focused on Improving code indentation and structure to make them readable, manageable, and easier to integrate. Product Delivery (Gran Sociedad): Developed a responsive landing page based on a dark-themed brand book, later pivoting the UI to a light-themed aesthetic following a brand transition request. Generated high-quality visual assets using AI tools and delivered the final production-ready code for local-to-server deployment, ensuring a fast and accurate handoff.	
Freelance Saak Solutions	Jul 2025 - Present
Scalable UI Systems: Architected a comprehensive UI Kit in Figma that improved design-to-dev handoff efficiency by 65%. Responsive Redesign: Led the redesign of web and mobile interfaces, focusing on performance optimization and accessibility standards. User-Centered Iteration: Increased overall product usability by 35% through continuous iteration based on user feedback and stakeholder requirements.	

Product UX/UI Designer | G21

Apr 2024 - Jun 2025

- **Web Interface Development:** Designed and developed responsive landing pages and corporate sites, ensuring alignment with brand identity and technical performance goals.
- **Visual Identity & Assets:** Created high-fidelity mockups and digital assets, streamlining the handoff process between design and final implementation.
- **CMS Management:** Administered and customized web platforms, optimizing content structure for better user engagement.
- **Insight Synthesis:** Responsible for identifying initial patterns, behaviors, and recurring pain points during the discovery phase to optimize web interfaces.
- **Research Documentation:** Generating structured notes for each interview, using documentation tools (Notion/ Miro) to centralize the team's findings.

Product UX/UI Designer / Front-End Developer | Adryo

Jul 2022 - Sep 2023

- **Design Coordination & Mentorship:** Mentored and coordinated a junior designer, delegating daily design tasks and providing technical guidance to ensure the platform's visual and operational consistency.
- **Hybrid Development & Design:** Built and maintained reusable UI components using PHP and JavaScript, bridging the gap between Figma prototypes and production-ready code.
- **Data Visualization:** Designed and implemented a performance dashboard that improved client tracking efficiency by 45%, focusing on clear information architecture.
- **Interaction Design:** Developed interactive prototypes and visual systems, conducting heuristic evaluations to resolve usability friction points.
- **UX Research & B2B Discovery:** Collaborate on research planning, defining user profiles, developing and validating interview guides, and managing the logistics of data collect. I conducted interviews with B2B users and stakeholders under the Design Lead's guidance, focusing on gathering qualitative information about user experience and information flows.
- **Data Management & Tools:** I was responsible for documenting interviews in a structured and professional manner, maintaining organized and tagged recordings using documentation tools such as Docs or Miró. I collaborated closely with the Design Lead and the research team to ensure that research findings were translated into functional UI components.
- Defined design goals and sprint tasks within agile workflows.
- Improved usability and interaction through heuristic evaluation.

UX/UI Designer & Front-End Developer | Colectivo Tlacuache Urbano

Aug 2020 - Apr 2022

- **User Research Foundations:** Conducted user research, empathy mapping, and information structure. Responsible for documenting interviews in a structured manner, including notes and highlights to guide the prototyping phase.
- **Web Development:** Designed website prototypes in Figma and developed sites in WordPress.
- **Visual Content:** Created and edited visual content for digital channels.

EDUCATION

Computer Science

Universidad de Londres | 2024 - Present

Master in UX/UI & Coding

DEV.F | 2020 - 2022
